DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Yuzhakov (6,565,532). Yuzhakov discloses a process for producing a pad base (20) for endermism in which a minute needle is installed upright on a skin side of a patch base for skin comprising the steps of immersing the end of multiple thin metal wires (12, 14) in a solution of synthetic resin raw material in a lengthwise direction to adhere the material to the periphery of the wires and pulling the wires out to form multiple microneedles (See Figures 1-6 and the respective portions of the specification.

Claims 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Park et al. (2002/0082543). See Figures 7a-7k and the respective portions of the specification. Park discloses a pad base for endermism comprising a minute needle installed upright on a skin side of a patch base for skin, wherein the minute needle is a hollow tubular body and the outer wall spreads and thickens toward the bottom, wherein the needles are made of biodegradable polylactic acid.

Claims 3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Rosenberg (6,623,457). See all figures, especially Figure 8. Rosenberg discloses a pad base for endermism comprising a minute needle (24) installed upright on a skin

side of a patch base (16) for skin, wherein the minute needle is a hollow tubular body and the outer wall thereof spreads and is thickened toward the bottom for the patch base wherein the microneedle array can be attached to a connection spot (106) of a syringe (100).
